

Finally a new faucet with the brains to turn
on and off automatically...from Central Brass

Introducing the "HANDS FREE"™ ELECTRONIC FAUCET

Designed for Airports, Restaurants, Hospitals, Hotels, Turnpikes and Nursing Homes

Sensor

An advanced idea is now a reality with the development of the "Hands Free" Electronic Faucet from Central Brass. This new U.L. Listed faucet is engineered for high volume, commercial use. Its' quality, rugged construction is combined with a safe, reliable electronic sensor, solenoid valve and transformer.

The "Hands Free" Faucet is designed for today's tough maintenance and sanitary problems. The electronic sensor is the

brains behind this dramatic new faucet. There is no touching. You activate the faucet when you approach the invisible* infra-red beam. When you step away from the faucet it shuts off automatically.

What more could you want in a faucet? It's "Hands Free", cost efficient and best of all it's from Central Brass. Delivering quality plumbing products since 1895.
